TITLE : MOVABLE WORK FOOTSTOOL

ABSTRACT : PROBLEM TO BE SOLVED: To provide a movable work footstool whose grounding positions can be changed freely by moving a part of the footstool while riding a part of the footstool when using for a variety of works.

SOLUTION: Opposing circular treadboards 2 and 3 are mounted in a footstool body 1 with an intermediate treadboard 5 interposed between them, the intermediate treadboard 5 is provided with a support rod 6 in the lower portion, and a rotating horizontal plate 7 provided with bearing portions 8 on both sides below the support rod 6 is provided decoratively. Rising and falling support rods 9 provided in the bottom of each of the circular treadboards 2 and 3 are inserted into the bearing portions 8 at both ends. The lower ends of the rising and falling support rods 9 are inserted into guide rods 10 below the bearing portions 8, springs 11 are interposed in the lower portions, liftable castors 12 are mounted in the lower portion of the springs 11. Support legs 13 grounding at a time when a load is applied thereto are mounted decoratively on the periphery of the castors 12.
